Title: Prevention and Control of Hypertension

Organized By	Pune Knowledge Cluster (PKC)
Date	17 th May 2022
Time	5:30 PM - 6: 30 PM
Location	Join Zoom Meeting Join Zoom Meeting https://us06web.zoom.us/j/89920560390?pwd=NEduOWpidGI1eHRVcm5uYndZOXJrZz09 Meeting ID: 899 2056 0390 Passcode: 565406
Background	<p>The World Health Organization attributes hypertension, or high blood pressure, as the leading cause of cardiovascular mortality. It has been recognized that more than 50% of the hypertensive population worldwide are unaware of their condition. To address this problem, the World Health League initiated a global awareness campaign on hypertension in 2005 and dedicated May 17 of each year as World Hypertension Day. In India, around 26 per cent of Indians above the age of 45 years reported to have been diagnosed with hypertension. The prevalence was higher (32 per cent) in senior citizens (aged 60 years and above) than those in the age group 45 to 59 years (21 per cent). The prevalence was higher in women (36 per cent) than men (27 per cent) among the senior citizens. The disease was also more prevalent among those living in urban areas (47 per cent) than those in rural areas (26 per cent).</p>
Open to all	It's public talk. Open to all
