DR. SHOBHA WAGHMODE

**Professor & Head
Department of Chemistry
MES Abasaheb Garware College,
Pune, Maharashtra**

Dr. Waghmode is an academican and researcher whose research interests include Graphene & core shell Nanomaterials, MOF, CO₂ capture & conversion, Metalloenzymes & Nanozymes. She has successfully led and executed several projects with government agencies such as ISRO, DBT, UGC, BCUD. She has received several awards including the BEST Teacher Award from SPPU in 2019. She has mentored over 100 students for their MS and PhD projects over 28 years. She hails from Varkute Khurd, small town in Pune District from a family of farmers. She is also passionate about nature conservation and volunteers with NGOs for green city initiatives.

An initiative by The Pune Knowledge Cluster, which aims to bring forward the journey of women in various fields of Science, Technology, Engineering & Mathematics (STEM). This series is conducted in an informal conversational format to help the audience relate to the lives of successful women professionals in S&T, knowing first-hand about their success stories, their failures, and how they moved ahead to make a mark in their field. We hope this initiative will inspire young women to break gender stereotypes, societal barriers and encourage them to pursue careers in STEM.
