

Pune Knowledge Cluster presents

## Title: Importance of epidemiology from a public health perspective

Organized By	Pune Knowledge Cluster (PKC)
Date	28 <sup>th</sup> June 2022
Time	4:00 to 5:00 pm
Location	<b>Online: (Provide the following details)</b> Zoom Link: <a href="https://us06web.zoom.us/j/89920560390?pwd=NEduOWpidGl1eHRVcm5uYndZOXJrZz09">https://us06web.zoom.us/j/89920560390?pwd=NEduOWpidGl1eHRVcm5uYndZOXJrZz09</a> Meeting ID: 899 2056 0390 Passcode: 565406
Description of the talk series	PKC's Health talk series aims to promote active discussions on mapping, tracking, mitigation, and understanding the impact of diseases at a city level. The series hosts talks, stakeholder meetings, and workshops to highlight health issues that plague the city and potential measures for their mitigation. It will also showcase research, and clinical and technological advances in the healthcare ecosystem.
Abstract	Epidemiology is, at its heart, the science of disease. It is the foundation of public health and is defined as the study of diseases in populations, investigating how, when, and why they occur. Today, epidemiologists use the insights gathered in their research to determine how illness within a population affects our society on a larger scale. This in turn, provides recommendations for interventions. This talk will focus on the interdependencies of Public Health and Epidemiology. The speaker will address how as a society/city/researcher we can use epidemiological tools to study, learn and reduce disease burden, and pre-empt, and predict diseases. Epidemiologists utilize Data, Epidemiological Modelling, and Contact Tracing as the basis to track diseases.
For whom (Target Audience)	B.Sc./ M.Sc./Ph. D Students /Community medicine/Professionals/ Public Health etc.... Its free and open to all.
Potential Gains	It will help in understanding the importance of Epidemiology from a public health perspective
