

International Conference on
Open and FAIR Data Ecosystem

Principles, Policies, and Platforms presents

SPECIAL EVENT

DIGITAL TWINS

A ROUND TABLE

We live in a world characterized by ever-increasing dynamics and uncertainty. Digital Twins provides fast, efficient, and effective means to quickly scale and solve in these highly uncertain times.

As the digital twin consortium gears up to launch its India regional branch, this round table acts as a preview to emerging digital twin technologies and their varied applications with particular focus on the Indian context. Global and local experts from telecom, logistics, retail, healthcare and others will present meaningful discussions and use cases. Leading speakers from digital twin consortium member companies, TCS Research, Aston University, Birmingham and various others have already confirmed participation.

We expect a broad ranging participation from industry as well as academia leading to lively and in-depth discussion.

10th September 2023
10:00 am - 3:00 pm
IIC, New Delhi
