From Microbes to Markets: Building a Sustainable Future explores Suchitha Raghunathan's journey from microbiology research to building a deep-tech biotechnology startup. The talk highlights how microbial innovations can address sustainability challenges in the textile industry, while offering insights into Entrepreneurship, Technology Commercialization, and the role of Science-driven solutions in creating a more sustainable future.

Speaker

SUCHITHA RAGHUNATHAN

CEO and Co-founder
Microbeworks Scientific

Suchitha Raghunathan is the CEO and Co-founder of Microbeworks Scientific, a deep-tech biotech start up developing sustainable microbial solutions for the textile industry. With a background in microbiology, she works at the intersection of Science, Entrepreneurship, and Sustainability. At Microbeworks Scientific, Suchitha leads the Research, Product development and Strategy.
